

Nature-Kleen 240V Operating Instructions

Important Safety Instructions

- To protect against risk of electric shock and personal injury, do not place the cord, plugs or the unit in water or any other liquid.
- Do not operate this unit if it has a damaged cord or plug, or after a malfunction.
- This appliance is not intended for outdoor use.
- Handle the cord carefully for longer life.
- Do not place the unit near an open flame.
- Do not try to repair the unit yourself. Only qualified service personnel should service this unit and your warranty will be voided if you open the unit.

Operating Instructions

After unpacking your Nature-Kleen, simply complete the following:

Tubing

Using household scissors, cut approximately six (6) inches of tubing. Affix one end of the 6" piece of tubing to the stainless steel output connector (marked as O3 output on the unit) on the Nature-Kleen unit by sliding the tube over the output connector.

Check valve (white piece)

Insert the white check valve into the other end of the 6" piece of tubing with the arrow on the check valve pointing towards the diffuser stone (away from the unit). The purpose of this one way check valve is to eliminate potential back-flow of water into the unit.

Diffuser Stone

Connect the diffuser stone to the other end of the tubing (where the check valve is not connected). Before using the unit for the first time; blow air through the open end of the tubing (with the diffuser ball connected) to ensure a good airflow. Now connect the open end of the tubing to the check valve.

Unit Placement

Place the unit on any free counter or wall space (between 12" and 36") that is away from the kitchen sink and close to an electrical outlet. Do not submerge the unit in the water.

Wall Mounting

- If you choose to wall mount this unit, it **MUST** be mounted **ABOVE** counter top level.
- You can choose to remove the feet from the bottom of the unit if you like.
- To secure the unit to the wall, screw in the two mounting screws 1½" apart on the wall. Then place the Nature-Kleen on the wall over the mounting screws and pull down to fasten securely.

We hope you enjoy using your Model Nature-Kleen unit. For more information on this product or any other air or water products, please contact your Distributor.

Nature-Kleen 240V Operating Instructions

Specifications

- Electrical: 240V AC @ 50 Hz
- Fuse: 2 Amp
- Ozone concentration: 250mg/hr
- Dimensions: (L) 9½" (W) 5" (H) 3"
- Weight: 2.25 pounds
- CE Listed

Parts and Accessories

- 1 x 6 feet tubing
- 1 x round diffuser stone
- 1 x check valve
- 2 x mounting screws

Features

- Available in 120V or 220V
- Breaks down residual trace amounts of toxic chemicals & pathogens on meat, fish, poultry, seafood and fruits & vegetables
- Kills bacteria, such as E-Coli, and viruses on the surface of fruits, vegetables, meat, fish, poultry & sea foods.
- Prolongs shelf life by 100%

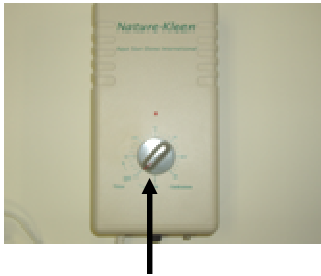

Warranty

- One Year

Operating Instructions

1. Fill your sink with cold water (approximately ¾ full).
2. Place the diffuser stone ball in the water.
3. Plug in the unit and turn it on by moving the knob on the front of the unit counter clockwise to the on position. Alternatively, you can choose how long you want the unit on by turning the knob clockwise to the chosen number of minutes you require. When the unit is on, you will see lots of little bubbles coming out of the diffuser ball – this is the Tri-Atomic Oxygen being transferred into the water.
4. Allow 10 minutes to ensure total saturation of the Tri-Atomic Oxygen into the water.
5. Place fruits, vegetables, meat or poultry in the water to sanitize and clean the produce.

Timetable

Fruits and Vegetables	5 to 6 minutes
All Meats	6 to 7 minutes
Poultry	7 to 8 minutes
16oz of Water	3 to 4 minutes

We hope you enjoy using your Model Nature-Kleen unit. For more information on this product or any other air or water products, please contact your Distributor.
