

# Model 5000 - Kleenair

dedicated to ozone performance

## PRODUCT OVERVIEW

The Model 5000 Kleenair is designed for general purpose applications including offices, hospitals, nursing homes, restaurants, health clubs and homes. Ozone is perfect for any location where a large area is confined and the odor problems are moderate to severe. This unit cleans both air and fabric and is designed for both large and long-term jobs. It will run continuously for as long as needed and has double the punch of most of our handheld portable units. It is enclosed in an all aluminum case and will treat an area up to 5,000 sq. ft. This unit utilizes ultra violet light to convert oxygen to ozone. Science has proven ozone to be one of the most powerful oxidizing (odor removing) agents known to man. It's nature's way of cleaning the environment.

## Flexible ozone solutions for your air sanitation needs

### HELPFUL HINTS:

- Make sure that all affected odor sources are dry.
- The ozone created by the Model 5000 Kleenair will circulate and attach itself to the odor molecules in the air and fabric, and it will then oxidize or burn the odor molecule on contact.
- When you have an odor such as pet urine, mold/mildew, paint fumes, etc., you will need to allow the appropriate time to conquer the odor completely.
- If after you have used the product you smell the abundance of ozone, you've simply overshot your target. Leave the room for 10 to 15 minutes and let the smell of ozone dissipate or subside. This will give you a fair test of whether or not the room has any remaining odors to target.

*This unit should be used in **UNOCCUPIED AREAS.***

AquaSunOzone

## SPECIFICATIONS

- Power: 120V AC
- Electrical draw: .08 Amp
- Fuse: 3.0 Amp
- Fan volume: 152 CFM
- UV bulbs (2)
- Dimensions: (L) 18" (W) 16" (H) 9"
- Weight: 12 lbs.
- Coverage: 5,000 sq. ft.

## FEATURES

- User friendly
- Energy efficient
- Electronic ballast
- Maintenance free
- Aluminum construction

## WARRANTY

- One Year
- Excellent Customer Support Team
