

Nature-Kleen 240V - Water Sanitizer

dedicated to ozone performance

PRODUCT OVERVIEW

The Nature-Kleen Water Sanitizer unit is great for cleaning foods like fruits, vegetables and poultry and will double the shelf life. It not only breaks down residual traces of toxic chemicals and pathogens but also kills bacteria and viruses on fruits, vegetables, meats, fish, seafood and poultry (not recommended for ground beef). It is a low cost, safe, portable and energy efficient water sanitation system.

HELPFUL HINTS

- Once the Nature-Kleen Water Sanitizer is ready to use, fill your sink with cold water (approximately 3/4 full). Place the diffuser stone in the water, plug in the unit and turn it on. At this point, you will see lots of little bubbles coming out of the diffuser stone. This is ozone being transferred into the water. After 10 minutes, the water will be saturated with ozone. You can now leave your fruits and vegetables for 15 minutes and remove. Store your fruits, vegetables and meats as usual. Do not reuse water for any other applications.
- The water created by the Nature-Kleen Water Sanitizer is perfect for killing bacteria and germs in your mouth. It will kill 99.99% of those germs on contact which can improve your breath.

SPECIFICATIONS

- Electrical: 240V AC @ 60 Hz
- Fuse: 2 Amp
- Ozone concentration: 250mg/hr
- Dimensions: (L) 9½" (W) 5" (H) 3"
- Weight: 2.25 pounds
