

MODEL 700 PERSONAL AIR PURIFIER OPERATING INSTRUCTIONS

PRODUCT OVERVIEW

When you are in an enclosed environment with little air circulation (airplane, movie theatre, etc.) this around-the-neck unit is the perfect solution to creating fresh, purified air. It is easy to use, simply put neck cord around your neck or attach the clasp to your shirt pocket with the vent facing upward. The Model 700 Personal Air Purifier silently generates a constant stream of refreshing ozone that kills bacteria and viruses. It also reduces irritating odors like tobacco smoke and even body odor without a fragrance that would simply mask the smell. This silent solution not only removes odors, but the negative ions also have the added benefit of removing contaminants, like dust and pollen from the air by weighing them down until they drop to the floor. To kill bacteria and viruses, eliminate irritating odors and clean the air, place this unit on your chest, turn it on and relax.

OPERATING INSTRUCTIONS

- Insert two (2) AAA alkaline batteries (not included).
- To attach the neck cord, simply take the black cord and hook it underneath the clip on the back of the unit. Pull the silver ball on the cord towards the unit and tighten. Place the cord around your neck.
- Alternatively, you can use the clip on the back of the unit to attach to your clothing.
- Turn the switch to on – and your unit is now running.
- This unit is not intended to be continuously used for longer than four hours.

SPECIFICATIONS

- Power: Two (2) AAA batteries (not included)
- Negative ion output: 1 million ions/cm³
- Ozone output: < 0.028 parts per million
- Dimensions: (L) 0.75" (W) 2.25" (H) 2.75"
