

Model 2500 240V - Kleenair

dedicated to ozone performance

PRODUCT OVERVIEW

The Model 2500 - Kleenair is designed for general purpose applications such as homes, small offices, beauty shops, boats, hotel rooms, RV's and mobile homes where space is confined and the odor problems are moderate to severe. The Model 2500 - Kleenair is ideal in situations of high humidity, continuous sources of pollution or where unusually persistent odors exist. It is enclosed in an all aluminum case for those rugged jobs and will treat an area up to 2500 sq. ft. This unit duplicates the clean fresh mountain air that occurs naturally outdoors; by utilizing ultra violet light to convert oxygen to activated oxygen. Science has proven ozone to be one of the most powerful oxidizing agents known to man.

Flexible ozone solutions for your air sanitation needs

HELPFUL HINTS

- The ozone created by the Model 2500 - Kleenair will circulate and attach itself to the odor molecules in the air and fabric, and it will then oxidize or burn the odor molecule on contact.
- Pungent or Mystery Odors can be removed by the Model 2500 - Kleenair, given the proper time and remembering to be sure all affected areas are dry.
- When you have an odor such as pet urine, mold/mildew, paint fumes, etc., you will need to allow the appropriate time to conquer the odor completely.
- Keep in mind that for ozone to contact odors deep in the carpet, padding and fabric, it will take longer than doing a simple smoking room.

SPECIFICATIONS

- Ozone Output: 22 PPM
- Ozone concentration produced by UV bulb
- Power: 240V AC
- Electrical draw: 0.4 Amp
- Fuse: 2.0 Amp
- Fan volume: 105 CFM
- Dimensions: (L) 13.5" (W) 6" (H) 9"
- Weight: 5 Lbs
- Coverage: 2500 sq. ft.

FEATURES

- User friendly
- Energy efficient
- Electronic ballast
- Aluminum construction
- Virtually maintenance free

WARRANTY

- One Year
- Excellent Customer Support Team
