

# XL-70 - Spa Ozonator

Patent Pending  
Micro Ozone Technology

dedicated to ozone performance

## ENTERPRISING PRODUCT DEVELOPMENT

One of the newer members of the Aqua Sun Ozone, International's product line is the XL-70 utilizing our Universal Power Supply. The XL-70 is the perfect solution for both your domestic 120V, and international 240V requirements. Your time is valuable and with the convenience of our Model XL-70 you will eliminate handling stock and inventory of two separate units. You will only have one unit to count, one set of serial numbers to track and one unit to order.

The XL-70 ozone technology utilizes Corona Discharge micro-ozone cell for residential spas, effectively removing water impurities and micro-organisms. Reduced chemical usage, less maintenance and the convenience of one unit are the benefits from our Pacifica Spa Series Model XL-70.

Aqua Sun Ozone's Corona Discharge micro-ozone cell provides consistent ozone output with less heat, less energy usage & less nitric acid. There are no cartridges, chips or bulbs to replace.

## Flexible ozone solutions for your spa sanitation needs

### OZONE FACTS

- Ozone does not have to be purchased or stored. Ozone is generated "on-site" and is introduced into the water automatically.
- Ozone does not affect the pH balance of water, thus minimizing pH adjustments.
- Ozone helps reduce total dissolved solids in water so that the water does not have to be changed as often.
- Ozone is an extremely effective oxidizer and reduces chemical use dramatically.
- Reduces damage to pillows and covers due to chemical usage.
